# Abdul Lathief A H

**AIML & Deployment Engineer** | Bengaluru & Chennai, India

lathief0410@gmail.com | +91 9952016104 |LinkedIn - Abdul lathief | GitHub: Abdul

## SUMMARY

AI/ML Engineer with experience in Generative AI, Large Language Models (LLMs), Computer Vision, and AI-powered solutions, backed by a strong foundation in Software Development and DevOps.Currently working at Paralaxiom Technologies, developing and deploying AI solutions for enterprise surveillance environments. Experienced in end-to-end deployment, CCTV/RTSP integration, AI model training and fine-tuning, annotation validation, accuracy testing, and production troubleshooting.Skilled in Linux (Ubuntu), Docker, system monitoring, and deployment of containerized applications in client environments. Previously gained experience in technical operations, software deployment, and DevOps at Tango Eye. Proficient in Python, JavaScript, React.js, Node.js, REST APIs, MySQL, MongoDB, and Firebase, with a focus on building, deploying, and optimizing reliable AI solutions.

## EXPERIENCE

**AIML and Deployment Engineer - Paralaxiom Technologies Private Limited** July 2026 to Present

- Develop and implement AI/ML use cases, including Generative AI, LLM applications, and Computer Vision solutions based on client requirements.
- Deploy AI-powered surveillance solutions and integrate AI modules with CCTV systems using RTSP, configuring FPS, bitrate, resolution, and detection zones.
- Train and fine-tune AI models using annotated datasets, validating annotations and optimizing model performance for improved detection accuracy.
- Perform AI model validation, accuracy testing, and quality assurance to identify data inconsistencies and ensure reliable video analytics.
- Deploy containerized AI applications on servers, monitor CPU/RAM/GPU utilization, troubleshoot production issues, and maintain deployment documentation.

**Technical Engineer – AI/ML Operations & Deployment - Tango Eye** Dec 2025 to June 2026

- Deployed and configured AI-powered applications in client environments, managing deployment workflows, production readiness, and system integration.
- Integrated surveillance applications with client CCTV systems using RTSP, configured camera parameters, and set up AI modules and detection zones.
- Configured and maintained servers, deployed containerized applications using Docker, and monitored CPU, RAM, and GPU utilization.
- Implemented DevOps practices, including Git version control, CI/CD fundamentals, deployment workflows, system monitoring, troubleshooting, and automation.
- Supported AI model training, fine-tuning, and validation; collaborated with AI/ML and operations teams to resolve deployment issues and ensure system stability and reliability.

**Full-Stack Developer - Intern** Aug 2024 – Sep 2025

- Developed and maintained responsive web applications using HTML, CSS, JavaScript, and React.js, focusing on reusable UI components and usability.
- Translated Figma designs and UI/UX specifications into functional, production-ready interfaces with consistent layouts and cross-device compatibility.
- Debugged application issues, performed testing, and optimized frontend performance to improve reliability and maintainability.
- Used Git for version control and collaborated with designers and developers, following coding standards, code reviews, and structured development workflows.

## PROJECTS

**NPRENEUR – Business Social Platform**

- Developed a full-stack social networking platform connecting entrepreneurs, investors, and viewers through role-based access control and a real-time content feed.
- Implemented Firebase Authentication, Realtime Database, and Cloud Storage to support user authentication, real-time data synchronization, and file storage.
- Built responsive and reusable UI components using React.js, ensuring a consistent user experience across desktop and mobile devices.
- Designed end-to-end UI/UX workflows in Figma and translated design prototypes into functional, production-ready interfaces.
- Leveraged Firebase's serverless infrastructure to minimize backend management and infrastructure costs while supporting scalable application development.

Tech Stack: React.js, Firebase, Firebase Authentication, Realtime Database, Cloud Storage, Figma.

**Face Recognition Attendance System**

- Developed an AI-powered attendance management system that captures live classroom video feeds and automates attendance marking through facial recognition.
- Implemented real-time face detection and recognition using OpenCV and a trained machine learning model to identify and match registered individuals.
- Integrated Firebase Realtime Database to store and retrieve attendance records, enabling real-time access to attendance data.
- Automated the attendance tracking process to reduce manual roll-call efforts and improve record management efficiency.
- Designed the system to process camera input and recognize faces under varying lighting conditions.

Tech Stack: Python, OpenCV, Machine Learning, Firebase Realtime Database

## SKILLS

- **Programming Languages:** Python, Java, JavaScript, TypeScript, SQL
- **AI/ML & Deployment:** Artificial Intelligence, Machine Learning, Generative AI, Large Language Models (LLMs), Computer Vision, Facial Recognition, Image Processing, Model Training, Model Fine-Tuning, AI Model Deployment, Dataset Preparation, Data Annotation, Model Validation, Detection Accuracy Testing, Production Deployment
- **AI Operations & Quality Assurance:** CCTV Integration, RTSP, Video Analytics, Detection Zone Configuration, Data Validation, Quality Assurance (QA), Production Support, Troubleshooting
- **Frontend Development:** HTML5, CSS3, React.js, Tailwind CSS, Bootstrap, Responsive Web Design, UI/UX Implementation
- **Backend Development:** Node.js, Express.js, RESTful APIs, Firebase Authentication, Firebase Realtime Database, Firebase Cloud Storage
- **Databases:** MySQL, MongoDB, Firebase Realtime Database, Database Management, Data Integrity Validation
- **DevOps & Infrastructure:** Linux (Ubuntu), Docker, Git, GitHub, CI/CD Fundamentals, Containerized Applications, System Monitoring, CPU/RAM/GPU Monitoring
- **Tools & Design:** Figma, Visual Studio Code, Modern Build Tools, Debugging Tools

## EDUCATION

- **B.Tech, Computer Science & Engineering** | 7.82 CGPA - Peri Institute Of Technology 2020 - 2024
- **HSC (Computer Science)** | Per - 63% – Padma Subramaniyan Bala bhavan Hr. Sec. School, Chennai. 2020
- **SSLC** | Per 70% – Vivekananda Vidhyalaya, Kundrathur. 2018

## CERTIFICATIONS

- **Artificial Intelligence –** NoviTech Sep 2025
- **Data Analysis** – NoviTech July 2025
- **JavaScript -** GUVI, 22nd August 2023
- **DEVOPS -** GUVI, 23rd September 2023
- **Full Stack Developer** - Simplilearn, 20th January 2023
- **UI & UX Designing Using FIGMA** - Simplilearn, 10th April 2023
- I**ntroduction to Cloud -** IBM , 8th MAY 2023

## ACHIEVEMENTS

- ADROIT STUDENT , SPINAETOS , 2023
- PAPER WARZ , EEE Tech event 2023
- PAPER PRESENTATION , Peri Institute of Technology , 2022
